ABSTRACTED-PUB-NO: DE 2557719A

BASIC-ABSTRACT: A piece of foam-backed carpeting intended  
to be fitted upon the  
floor of motor vehicles has an absorbent (film) web firmly  
adhesively bonded  
between carpet and foam backing.

The film prevents plastics foam from penetrating through  
the carpet when the  
backing is foamed-on, thus eliminating risk of an unsightly  
finished of the  
carpet with concomitant high rate of rejects. This is esp.  
important when  
relatively loosely woven carpets are used, with  
polyurethane backing which is  
practically impossible to remove from the carpet, once  
applied and cured.
